Objective

Aspiring Robotics / Computer Vision Engineer (Third-year B.Tech CSE – Artificial Intelligence) with hands-on experience in ROS, PX4 and Python. Passionate about autonomy and vision-driven robotics systems. Seeking internships or roles where I can apply perception and control skills to real-world robotic problems.

Education

- **B.Tech in Computer Science and Engineering (Artificial Intelligence)** *2023 – Present*
Pursuing B.Tech (3rd Year).
(kakinada institute of engineering and technology, kakinada)
- **Intermediate(Mpc)** *2023 – Completed*
Pursuing B.Tech (3rd Year).
(sri chaitanya junior college, vijayawada)
- * **ssc** *2023 – Completed*
high school (10th).
(vivekananda centenary high school,vijayawada)

Personal Projects

- * **PX4 Autopilot — Green Mat Tracking** *(Academic / Personal Project)*
Tech stack: Python, ROS, PX4, MAVSDK, OpenCV, Gazebo
Implemented a vision-based path following system to detect and follow a green mat. Built ROS nodes for perception and control and integrated with PX4/MAVSDK for offboard commands. Tuned HSV thresholds and control loops to improve tracking reliability under different lighting conditions.

Skills

- * **Languages:** Python
- * **Robotics / Tools:** ROS, PX4, Gazebo, MAVSDK, Git, Linux
- * **Computer Vision:** OpenCV, image processing, Machine learning

Extracurricular & Interests

- * Telugu screenplay writing, storytelling, ancient music, robotics club activities

Soft Skills

- * Problem-solving • Teamwork • Communication • Adaptability

Languages

* English (Fluent), Telugu (Native)
